

# Apples: The Unit: A Focused Learning Complete Lesson Plan (Thematic Units) (Volume 1)

An all-inclusive unit based on the theme of apples - a great fall or back-to-school lesson plan! This book includes daily activities with detailed instructions, worksheets and activities with full-color pages to photocopy and distribute to your class. The last section in the book contains a series of supplemental activities including vocabulary cards (nomenclature cards), and sequencing/patterns. All of these activities are designed with preschool and kindergarten children in mind and can be presented in a one-on-one homeschool setting, or a large class setting. The activity pages can be duplicated for your entire class, and suggestions for variations and advanced use of the hands-on activities are included where appropriate. This is a basic weekly outline that incorporates math, literacy, science, history and geography for and uses concepts that children at this stage should be learning or reviewing. You should include your own books, music, videos, field trips, etc. as well as any cultural or religious influences - along with this unit to personalize it to your needs!

A collection of pumpkin-themed activities to keep little hands learning in October.
