

## Shattered Memories (Charleston Earthquake Series Book 1)

The Charleston earthquake has left destruction like nothing Doctor Andrew Warwick has ever seen. On a desperate mission to find the lady who owns his heart, he frantically searches through the rubble, where he finds her injured and lifeless. After she regains consciousness, the doctors hopes are quickly dashed as he realizes she doesn't remember him. Things only get worse when he discovers she believes she's still engaged to the abusive scoundrel, Lloyd Pratt. Now Drew is on a race with the wedding clock to either help her remember or win her heart again before she marries the wrong man. Waking in a makeshift hospital, Olivia Macqueen finds herself recovering from a head injury. With amnesia stealing a year of her memories, she has trouble discerning between lies and truth. When her memories start returning in bits and pieces, she must keep up the charade of amnesia until she can find out the truth behind the embezzlement of her family's business while evading the danger lurking around her.
