

Applied GPS for Engineers and Project Managers introduces civil engineers—especially those who are not already licensed surveyors—to the fundamental principles of global positioning technology (GPS). This book covers GPS basics, including positioning and measuring principles, techniques to improve accuracy, and an analysis of low-cost versus high-precision systems. Subsequent chapters explain the considerations for selecting and implementing a GPS system and then demonstrate specific applications of GPS in a variety of engineering situations, including monitoring the health of structures, robotics and machine control, maritime operations, material tracking in large construction sites, site control and design, and monitoring geohazards. This book will be valuable for all civil engineers interested in benefiting from the use of GPS technologies.

Warrior Queens: Boadiceas Chariot (WOMEN IN HISTORY), A Lady at Last (Mills & Boon M&B) (The DeWarenne Dynasty, Book 4), The Desert Journal: A Diary, 1954-55, Ice Bird: The first single-handed voyage to Antarctica, Degree of Risk (Shadow Warriors Book 4), Le bebe du Cap-Vert - Le retour de Daisy (Passions) (French Edition), Marketing in the Public Sector: A Roadmap for Improved Performance, PERSONAL POWER II. CREATIVE POWER (Or your Constructive Forces) (Timeless Wisdom Collection Book 131), All Stirred Up (The Stirring Series Book 2), Shemot (English): Student Version (English and Hebrew Edition),
