

Pronounced atheist Richard Dawkins has claimed that no theologian has ever produced a satisfactory response to his arguments that there most likely is not a God. In this open-minded and innovative philosophical challenge, theologian David Ward addresses Dawkins's various ideas with sharp, clear arguments. He points out that when Dawkins—a scientist—enters the world of philosophy and religion, his passion often leads his argumentation to descend into stereotyping, pastiche, and mockery. Stimulating and thought-provoking, this study both locates the flaws in Dawkins's arguments and makes a perfectly rational case for the existence of God.
